DPRIS. Transforming Access to Official Military Personnel Records

DPRIS provides a conduit for the secure electronic retrieval of document images from the Military Services' Official Military Personnel File (OMPF) systems, and narrative data from the Joint Services Records Research Center (JSRRC), in response to request initiated by authorized and approved government agency users, authorized subordinate agencies, and veterans.

DPRIS was developed as a single enterprise gateway, to provide access to vital military personnel information on demand and in near real-time through secure system-to-system interfaces and Web access by employing leading edge technologies, including all aspects of information assurance.

"DPRIS has greatly improved our ability to gain access to personnel information needed to support the people who matter most — our veterans. Getting these records used to take several months — now, for the veterans who left Service in the last 10 years, we can get the personnel records in hours."

Vice Admiral Daniel L. Cooper (Ret.)
Former Under Secretary for Benefits,
Department of Veterans Affairs
